Group Charlie
Multi-Lingual SMS

Andrew, Chihang, Daria, Swaraj and Tanvi

University of Cambridge

March 4, 2015

Background

- Africa's Voices: Opinion polling done by broadcasting a variety of questions from several radio stations, where answers were received as SMS messages.

Background

- Africa's Voices: Opinion polling done by broadcasting a variety of questions from several radio stations, where answers were received as SMS messages.
- The SMS messages were in different languages and sometimes included irrelevant information, such as details of the sender.

Background

▶ Africa's Voices: Opinion polling done by broadcasting a variety of questions from several radio stations, where answers were received as SMS messages.

▶ The SMS messages were in different languages and sometimes included irrelevant information, such as details of the sender.

▶ Problem we're trying to solve: allow for easy detection of opinion trends in such data.

Our goal

- This is a tool for scientists
